*Lamp on dimmest setting

NOMAD™

- Perfect for outdoor dining, patios, gardens, camping and caravans
- Collapsible compact design, ideal for travel
- Versatile flying insect killer and 200 lumens lamp
- USB charged for up to 18 hours of use

Convenient hook design to hang unit under parasols or inside a tent

Dual Blue UV and green LEDs to attract a wide range of flying insects

Powerful electric grid to target flying and biting insects

Bright 200 lumens light with adjustable brightness

Collapsible compact design, ideal for travel

Test trials have shown that Nomad catches more mosquitoes than a major competitor product on the market. Nomad also has a much higher output of useful UV than the competitor product. Useful UV is required to attract flying insect pests to the electric kill grid.
